Andrii Yatsechko

WEB DEVELOPER / UI/UX DESIGNER / N8N AUTOMATION SPECIALIST

PROFESSIONAL SUMMARY

Web Developer, UI/UX Designer, and Workflow Automation Specialist (n8n). I design responsive websites, landing pages, and interactive user interfaces from scratch, connecting them directly to intelligent backend automation pipelines and AI agents (n8n, OpenAI, Gemini). Specializing in responsive web layout (HTML5, CSS3, JS), mobile optimization, and third-party API integration to provide end-to-end web products.

Military Service (AFU | 2 years): My 2-year service in the Armed Forces of Ukraine (AFU) built strict discipline, extreme resilience under pressure, rapid problem-solving, and a commitment to delivering reliable results under any conditions.

WORK EXPERIENCE

Web Developer / n8n Developer / UI/UX Designer June 2025 — Present
Freelance & Project-based

- Built and styled responsive landing pages and user interfaces with integrated lead capture forms connected directly to n8n workflows.
- Designed and deployed 15+ production n8n automation workflows, cutting clients' manual operational time by 40%.
- Architected autonomous conversational AI agents to process text/voice requests, extract structured data, and interact with users.
- Established secure two-way data sync pipelines between cloud storages (OneDrive, Google Drive), Google Sheets, and Telegram bots.

IMPLEMENTED SOLUTIONS: WEB & UI/UX

- Interactive Landing Page for Spa Studio**
Description: Responsive landing page with premium glassmorphic UI, interactive services list, pricing, and booking form connected to Telegram for instant admin alerts.
Result: Flawless mobile rendering and instant customer lead alerts.
- Responsive Website for "Apetissimo Cafe" (Durrës, Albania)**
Description: Lightweight mobile-friendly site with digital interactive menu, food photo gallery, embedded map directions, and reservation form.
Result: Easy menu access via table QR codes and increased table bookings from foreign tourists.
- Personal Responsive Portfolio Website**
Description: Bilingual Glassmorphism portfolio website with animated backgrounds, dynamic modals, and responsive layout mobile wiggle fixes.
Result: Fully digitized skill showcase, 100% mobile responsive, fast page speed.
- AI-Assistant Telegram Bot (SMM Automation)**
Description: Captures voice notes, transcribes via Whisper, uses a GPT-5-mini agent to write social posts, generates 4:5 graphics via gpt-image-2, and auto-posts to Instagram & Threads.
Result: Reduced SMM creation and publishing time from 1 hour to 15 seconds.
- Multi-Format Resume Parser**
Description: Gmail-triggered workflow that downloads PDF/DOCX resumes, transcribes scans using Whisper OCR, extracts skills/contacts via GPT-4o-mini, and exports structured JSON to CRM.
Result: Saved 85% of manual resume screening time for the hiring team.
- Telegram to OneDrive Logger**
Description: Telegram bot that logs instructions, adding timestamps using custom JS, and automatically syncs them into text files in OneDrive in real time.
Result: 100% task preservation with sync latency of less than 3 seconds.

Automation

- n8n Workflows
- Switch / If Nodes
- HTTP Request
- Error Handling
- Data Pipelines
- JSON Parsing

Artificial Intelligence

- OpenAI API
- gpt-5-mini
- gpt-image-2
- OpenRouter
- Gemini Vision AI
- Prompt Eng.
- AI Agents

Soft Skills

- Stress Resilience
- Rapid Adaptability
- Results-Oriented
- Analytical Thinking

Implemented Solutions: Automation & AI

7. AI Financial Assistant (Expense Tracker)

Description: Telegram bot that processes receipt photos or text. Uses Gemini Vision AI to recognize values, categorizes expenses, and syncs them automatically to Google Sheets.
Result: Logging expenses takes less than 5 seconds instead of manual sheets entry.

8. HR Assistant Olena (AI Recruiter)

Description: Conversational AI recruiter in Telegram. Qualifies candidates against requirements, queries Google Calendar, and schedules intro slots with automatic Google Meet links.
Result: Saves recruiters approximately 12 hours of manual screening time per week.

9. Photo-to-PDF Converter

Description: Telegram bot that automatically corrects perspective, clears shadows, increases text contrast to sharp black-and-white, and merges pages into a single PDF with searchable OCR text.
Result: Free document digitizing without ads, limits, or watermarks.
